

TEMPLATE FOR CUSTOM-MADE KNIVES

You can use this template when drawing your profile. Either use your existing profile and draw it against the grid or draw your own profile measured using the grid. The template is made to fit an A4 paper.

ATTENTION! Do not print the paper with the setting "fit to screen". The paper needs to be printed at 100% for the grid to match. One square = 5 mm.

Once you have drawn the profile, scan (preferably) or take a photo of the template and upload the file to us. You can also send it to us by regular post.

 **LOGOSOL**

A4 (210x297 mm)

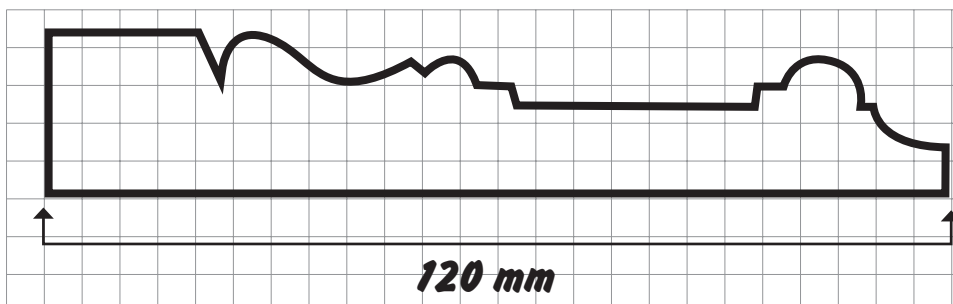

SCALE 1:1

 = 5 mm
