

MACHINE TOOLS FOR YOUR LOGOSOL MACHINES

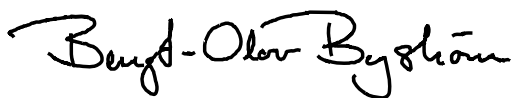

DISCOVER A WIDE PRODUCT RANGE FOR LOGOSOL MACHINES!

Please leaf through our new tool catalogue! Logosol offers a selection of cutting equipment, which includes moulding knives, cutters, blades, end cutters, and other useful cutting tools. Our goal is that you should always be able to choose a Logosol product when you expand your activities.

We offer you an exciting range of tools for hobbyists, craftsmen and light industry in the field of wood processing. You can find the whole range here in our catalogue, in our Internet shop and at our dealers, world-wide. Please contact us, and we will help you find the right product!

We want to be a one-stop supplier for people who work in wood. Logosol has unique experience of small-scale sawing, planing and woodworking. We hope you will find what you need in this catalogue.

You are warmly welcome!

Bengt-Olov Byström

Founder and chairman,
Logosol in Härnösand, Sweden

TB SYSTEM

The following pages contain a selection of the knives that are available for our TB universal cutters. We have several Swedish and Norwegian standard profiles, and also moulding knives from the American standard collection.

You can choose from 1000 different moulding knives when you set up your own range of planed goods. The knives can be combined in an infinite number of ways, but if you can not find what you are looking for, we can make special knives to your own design.

MAKE YOUR OWN PROFILE

CUSTOM-MADE MOULDING KNIVES FOR THE TB SYSTEM

We offer custom-made profiles or grooved knives at a low cost. We draw the profile in a CAD program, that is then transferred to the machine that makes the knives. We need a sketch, drawing or wood sample to do this. **NOTE!** Remember to specify the reference dimensions on the drawings.

REMEMBER BEFORE YOU ORDER!

1. Choose the right steel blank

You can choose from different grades of steel, depending on the amount of work you intend to do with your blade.

Tool steel

Works well in softwood, such as spruce and pine, and if you are going to process less than 200 linear metres.

HSS 6%

Works well in softwood, such as spruce and pine, and if you are going to process more than 200 linear metres or end grain.

HSS 18%

Should be chosen if you are going to machine hardwoods like oak or beech.

HM

Should be chosen if you are going to machine materials like teak and MDF

Thickness

4 mm

Is the most common thickness, which works for most machining.

5.5 mm

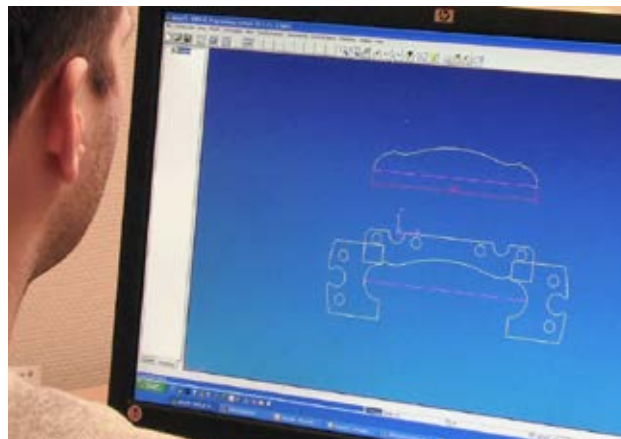

Should be chosen if you have tough machining jobs or large profiles.

2. Order form

Please use our form on the next page, or look through it to see what information we need to expedite your order as quickly and smoothly as possible.

3. Name and address

Please always include your name, address and phone number, so we can contact you if necessary.

We start by using a CAD program in the computer to draw the profile that you want, using a sketch or other sample from you.

WHAT DOES THE LAW SAY...

... about our steel blanks? Swedish Standard SS-EN874-1 specifies that the profile depth (A) of the knives for our universal cutters must not exceed the table below.

Thickness	SP/Tool Steel	HSS/High Speed Steel	HM/Hard metal
4 mm	17	21	11
5.5 mm	25	25	21

UNIVERSAL CUTTER HEADS

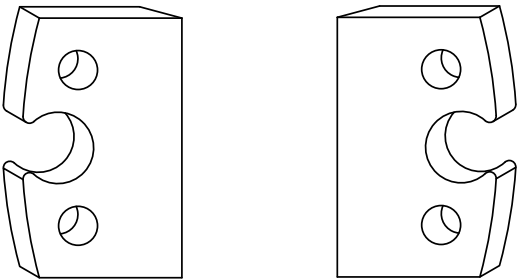

A solid cutter head with attachments for replaceable moulding knives. These are the tools that are normally used in Logosol's planer/moulders, and that are also referred to as the TB system. A moulding knife can be changed quickly, and all knives are designed to have a common minimum flight diameter. This means that you save time, since the fences in the machine does not have to be repositioned when you are changing moulding knives. The flexibility of this system allows most machining operations to be done at a very reasonable price.

TB90 CUTTER HEAD

- Suits all stationary routers, with 20 or 30 mm spindle standard. Can also be used for side spindles in multi-spindle machines.
- All our TB90 cutter heads can use 40, 50 or 60 mm wide knives.
- TB90-92 cutter heads can be stacked, using a couple of dowels. Part no. 8x20
- The knives are quickly and easily inserted in the cutter head, using pins that ensure that the knives can not come loose, and that they are exactly aligned. Some cutter heads are also available with chip limiters, which reduce the risk of digging-in.

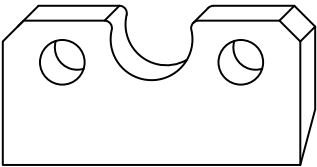

MOULDING KNIVES

- Moulding knives like these suit our TB90 cutter heads plus other commercially available cutter heads with the same hole pattern.

Steel grade	
Tool steel	Works well in softwood like spruce and pine, if you are going to machine less than 200 linear-metres.
HSS 6%	Works well in softwood like spruce and pine.
HSS 18%	Should be chosen if you are going to machine hardwoods like oak and beech
HM	Should be chosen if you are going to machine materials like teak and MDF

- When you order a chip limiter, put an S at the end of the knife's SKU number.

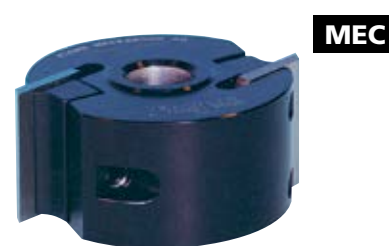

- These knives fit the TB98 cutter head and the top cutter in Logosol and Moreten planers.
- This type of moulding knife, with up to 5 mm projection, can also be used in the bottom cutter in the planers mentioned above.

TB90-84

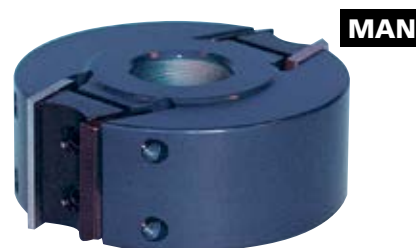

This is a cutter head that is suitable for machinery with smaller table opening. Another advantage of this cutter head is that it can work on smaller radii. Delivered with a pair of 40 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-84-20	Aluminium	78	40	2	20	4
TB90-84-30	Aluminium	78	40	2	30	4

**WP90 WITH CHIP LIMITER**

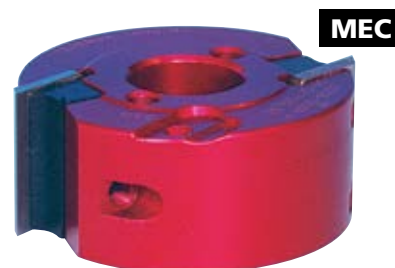

An aluminium cutter head, which gives a very low weight. The cutter has a chip limiter to reduce dig-in and kick-back (max. chip thickness 1.1 mm). When you order a chip limiter, put an S at the end of the SKU number. Delivered with a pair of 40 mm wide rabbeting knives and chip limiters.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
WPTB90-98S	Aluminium	100	40	2+chip limiter	30	4

**TB90-92**

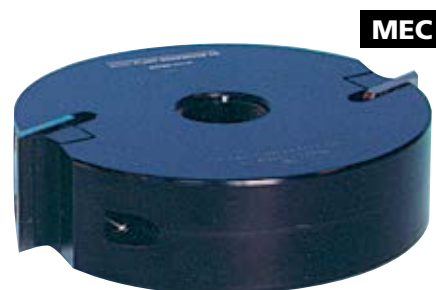

The TB90-92 is an aluminium cutter head, which gives it a very low weight. The cutter is designed for indexable inserts, SKU no. **HM-9000**. Delivered with a pair of 40 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-92	Aluminium	88	40	2	30	4

**TB90-140**

An aluminium cutter head, an excellent choice for machining tenons. Delivered with a pair of 40 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-140	Aluminium	138	40	2	30	4

UNIVERSAL CUTTER HEAD TB90-92 STEEL

TB90-92 steel is a zinc plated, very durable steel cutter. Suitable for tough jobs. Delivered with a pair of 50 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-92 Steel	Steel	88	40	2	30	4-5,5

MEC

UNIVERSAL CUTTER HEAD TB90-92 Z4

TB90-92 Z4 is a zinc plated steel cutter head with 4 knives. Four knives means that you can increase the feed rate of the machine, and still maintain an excellent finish. Delivered with four 50 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-92 Z4	Steel	88	40	4	30	4-5,5

MEC

UNIVERSAL CUTTER TB912-92

Black chromed universal cutter head, steel. The cutter head is 120 mm high and works with both 5.5 and 4 mm thick knives. Intended for 130 mm moulding knives. Delivered without knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB912-92	Steel	88	120	2	30	4-5,5

MEC

SAFETY CUTTER TB912-92S

Black chromed safety cutter head, steel. The cutter head can be fitted with a chip limiter to reduce dig-in and kick-back (max. chip thickness 1.1 mm). When you order a chip limiter, put an S at the end of the SKU number. The cutter head is 120 mm high and works with both 5.5 and 4 mm thick knives. Intended for 130 mm moulding knives. Delivered without knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB912-92S	Steel	88	120	2+chip limiter	30	4-5,5

MAN

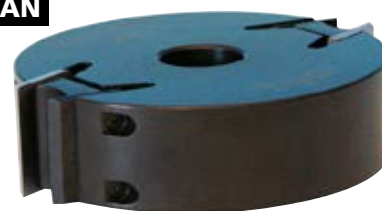

SAFETY CUTTER HEAD TB90-140S

A steel safety cutter head that is excellent for machining mortises. Delivered with 1 pair of 40 mm rabbeting knives and chip limiters. The cutter head is included in the TB9 Window kit.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-140S	Steel	138	40	2+chip limiter	30	4-5,5
TB90-200S	Steel	198	40	2+chip limiter	30	4-5,5

MAN

SAFETY CUTTER HEAD TB90-92S

A steel cutter head for tough jobs. The cutter head has a chip limiter to reduce dig-in and kick-back (max. chip thickness 1.1 mm). When you order a chip limiter, put an S at the end of the SKU number. Delivered with a pair of 40 mm wide rabbeting knives and chip limiters.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-92S	Steel	88	40	2+chip limiter	30	4-5,5

MAN

TB90-120

TB90-120 is a steel cutter head for tougher machining jobs. Delivered with a pair of 40 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-120	Steel	120	40	2	30	4

MEC

TB90-120 Z4

4-knife cutter head, for a finer workpiece surface or increased feed rate. Delivered with four 40 mm wide rabbeting knives.

SKU	Material	Dia.	Height	Blade	Hole	Thickness, blade
TB90-120Z4	Steel	120	40	4	30	4

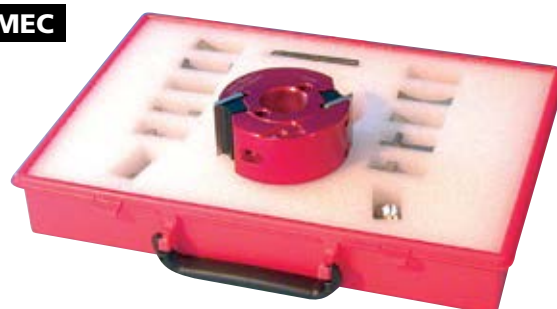

MEC

UNIVERSAL CUTTER KITS TB90

Complete basic kits in a practical plastic protective package, containing the most commonly used cutter knives, plus an aluminium TB90-92 universal cutter head.

MEC

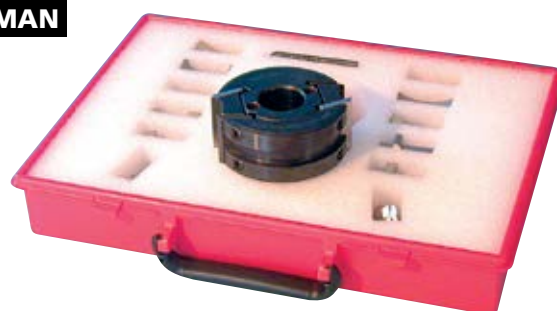

SKU	Description
TB90-06	Cutter head + 7 pairs of knives (9000-9006)

KNIFE GIBS

Spare part gibs for the TB89 cutter head.

SKU	Description
99-1318-3	Gib, 38mm for TB98
99-1318-82	Gib, 100mm for TB98
99-1318-2	Gib, 180 mm for TB98

For installing TB90 knives in Moreten Logosol planer/ moulders in the top and bottom cutters. Supplied in pairs.

SKU	Description
7000-000-9502	Standard

Adjustable gib that allows the knife to be adjusted ± 2 mm in height. Supplied in pairs.

SKU	Description
7000-000-9506	Adjustable gib

Narrow gib that allows 5.5 thick knives to be used in Moreten Logosol planer/moulders in the top and bottom cutters. Can also be used to install 100 mm and 130 mm knives in the Logosol SH230. Supplied in pairs.

SKU	Description
7000-000-9508	Narrow gib

For installing TB90 knives in Logosol PH360 in the top cutter. Supplied in pairs.

SKU	Description
KIL360-048	Standard for top cutter PH360

TB98 UNIVERSAL CUTTER HEAD

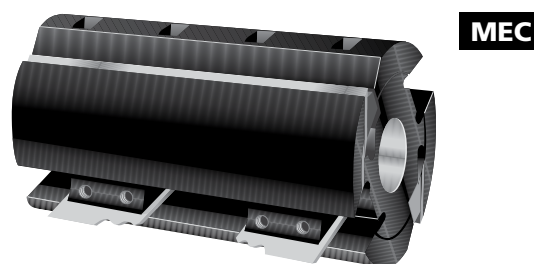

This cutter head gives you an excellent opportunity for machining neat, unique profiles with your planer/moulder or vertical milling machine in a simple, rational manner.

The TB98 cutter head can be used with advantage to make fully profiled mouldings in one and the same operation. We have illustrated some of the possibilities in the "Combinations" section (see page 102).

The cutter head can be installed in most planer/moulders or stationary milling machines.

TB98 Universal Profile Cutter

The TB98 cutter head can be used in combination with planer/moulders or vertically, in stationary milling machines. The cutter head is equipped with two straight HSS knives for flat machining/planing and two grooves that hold four tension gibs, designed for moulding knives from the TB system, adjustable across the entire width of the cutter.

SKU	Dia.	Hole	Width	Z

VERTICAL MILLING CUTTERS

In some routing jobs, fixed cutters are preferable to loose cutter blades. For example, this could be when you want to cut really deep profiles, such as in window manufacture or when you want to remove a lot of material at high speed.

Our vertical milling cutter range contains of a wide selection of professional cutters with indexable inserts or brazed hard metal knives. Log21, our own brand, is a very priceworthy choice. This range, which we have designed ourselves, includes the cutters that we believe meet the basic requirements for vertical milling.

Loose insert

Order no: 4.09.1201, 4.09.1202, 4.09.1203, 4.09.1204

WHAT DOES THE LAW SAY

MAN marked tools must be used in an standard milling machine. Tools marked MEC can be used in a multi-spindle machine like the planer/moulders.

PRO WINDOW CUTTER KIT

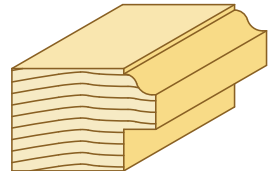

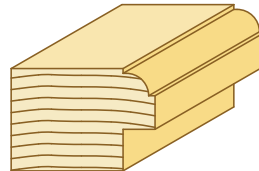

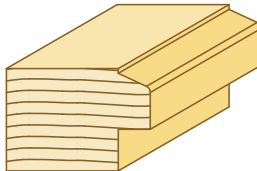

For linked casements on outwards opening 1+1 pane windows with 3 different casement profiles.

A kit of 18 different cutter heads with indeaxble hard metal inserts. The kit includes cutter heads for routing the tenons and slots for both casement and window frame.

The shank height and depth of cut are quickly and easily set once, using the accompanying setting gauge for all long routing cuts. The same principle is used for mortise and slot cuts, where only the cutter and spacer rings are changed for each routing task, using the accompanying drawings.

- * Largest tool diameter is 206 mm.
- * Greatest set-up height is 140 mm.
- * Spindle diameter 30 mm

Mortise & Tenon for casement WP50001

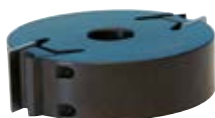

TB90 WINDOW CUTTER KIT

For making windows. This tool kit can be used to make conventional coupled casement 2 or 3 pane insulating glass windows with conventional casements and glazing bars. The requirement is that there must be access to a jointer/planer, a circular saw and a milling machine with a 30 mm spindle. This window cutter kit is the most flexible one commercially available, allowing you to configure your window production to meet customer requirements for profiling of the windows to be produced. To make production as efficient as possible with this kit, order an extra TB90-140S cutter, so you can make the tenons in one pass, as in the illustration on the next page.
