Build Template **HEART BENCH**

BUILD A BEAUTIFUL **HEART BENCH**

A fun and simple construction project that results in a comfortable heart-shaped bench.

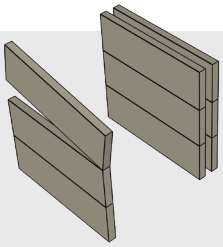
Cutting list:

6 pcs 28 x 145 x 450 mm (Hearts)
4 pcs 45 x 70 x 380 mm (Legs)
31 pcs 20 x 40 x 1500 mm (Joists)

Build description:

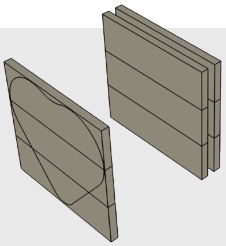
All measurements are approximate and can be adjusted according to needs.

1. Glue together three planks with dimensions 28x145x450 mm. Make three sets of these end pieces.

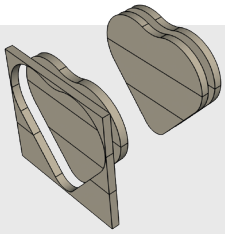


2. Draw a heart shape on one of the glued-together end pieces.

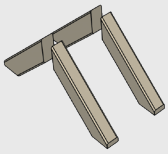
Tip! Make the heart a little flat on top.



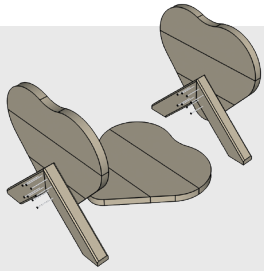
3. Cut out the shape with a band saw or jigsaw. Use it as a template for the other two ends and cut these out as well.



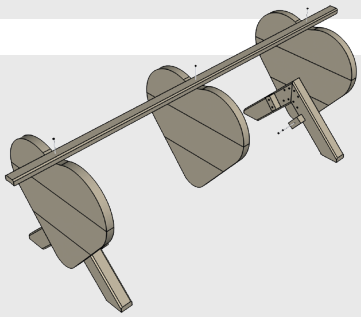
4. Make four legs with the dimensions 45x70x380 mm. Cut the ends at a 45 degree angle.



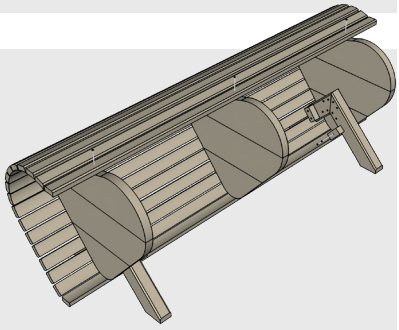
5. Screw or nail the legs to two of the ends.



6. Nail the hearts to the joist. Start with the one in the middle at the top.



7. Continue with the rest of the joists.
By the legs you might need extra pieces to fasten the joists.



8. Good work! Now the heart bench is ready.
